SKILLS

Proficient in: JavaScript, Python, React, Next.js, Tailwind CSS, Flask, Git / GitHub

Familiar with: Node.js, Express, MongoDB, Mongoose, MySQL, Styled Components

PROJECTS

Adopta.click | [GitHub Repository](#)

- Built an adoption platform that allows anyone to put pets for adoption and pets to be adopted, it features a login and register page and search filters for the pets
- Implemented a back-end using Python with **Flask**, **Tailwind CSS** for the user interface, design models with **MySQL** as the database and beautiful animations with AOS Library

Ghibli Dictionary | [Website](#), [GitHub Repository](#)

- Created a website that consumes the Studio Ghibli API using **axios** to show information about all of their 22 movies, enhanced the user experience with beautiful animations using **Framer Motion**
- Implemented server-side rendering using **React** with **Next.js**, and **Tailwind CSS** for the styling

Nijistreams | [Website](#), [GitHub Repository](#)

- Developed a platform that allows people to check which members from the Vtuber group Nijisanji are streaming, it shows what they are streaming, the topic and the live viewer count
- Created the front-end with **React**, **Styled Components** for the design, and **React Router 6** for fast page routing

Country Search | [Website](#), [GitHub Repository](#)

- Developed a website that shows information about countries using a **GraphQL API**, implemented a search bar for the countries that also shows the continent in which the countries are located
- Created web interfaces with **Tailwind CSS**, **React** and consumed a GraphQL API using Apollo Client
